### **DETAILED ACTION**

Claims 1-17, 21-33 are presented for examination.

### ***Status of the Case***

The Amendments and Remarks, filed October 1, 2007, have been received and entered into the application.

Applicant's arguments, filed October 1, 2007, have been fully considered but they are not deemed to be persuasive. Rejections not reiterated from previous Office Actions are hereby withdrawn. The following rejections are either reiterated or newly applied. They constitute the complete set of rejections presently being applied to the instant application.

### ***Maintained Claim Rejections - 35 USC § 103***

The rejection of claims 1, 13-17, 30-33 under 35 U.S.C. 103(a) as being unpatentable over Leung et al. (US Patent No. 6596298 B2), in view Eisenstadt et al. (US Patent No. 5846557), along with Oppenheimer et al. (US Patent No. 4980169), taken with Damani et al. and further in view of Babich et al. (US Patent No. 6395299 B1) ) has been maintained for the reasons stated in the prior Office Action June 29, 2007 and further in view of the following remarks.

### ***Response to Arguments***

Applicant argues that Leung does not disclose the use of polydextrose in a water-soluble film forming matrix in edible films. Examiner does not agree Leung et al. teach a water soluble film-forming polymer such as pullulan (see abstract) that contains polysaccharides such as dextrose (see col. 6, lines 25-32). Applicant further argues that Eisenstadt et al. does not teach the use of polydextrose in a film forming matrix. However, it is known that chewing gums are made of thin films and those chunky chewing gums all when chewed has a film characteristics in the mouth see col. 9, lined 21-59 for the use of polydextrose in the chewing gum. Products of identical compounds cannot have mutually exclusive properties.

Applicant in his remarks argues that the prior art references combined do not teach the claimed invention. Applicant is reminded that the obviousness rejection is not an anticipation rejection. Leung et al. and Eisenstadt et al. clearly teach a water-soluble film comprising polydextrose. In obviousness rejection a combination of references is used, and the references are relied upon in combination and are not meant to be considered separately as in a vacuum. It is the combination of all of the cited and relied upon references that make up the state of the art with regard to the claimed invention. Applicant's claimed invention fails to patentably distinguish over the state of the art represented by the combination of the cited references. *In re Young*, 403 F.2d 754, 159 USPQ 725(CCPA 1968); *In re Keller* 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

Moreover, it is noted that rejections under 35 U.S.C. 103(a) are based on combinations of references, where the secondary references are cited to reconcile the deficiencies of the primary reference with the knowledge generally available to one ordinary skill in the art to show that the differences between Applicant's invention and the prior art are such that they would have been modifications that were *prima facie* obvious to the skilled artisan. It is noted that the claimed invention is not required to be expressly suggested in its entirety by any one or all of the references cited under 35 U.S.C. 103(a). Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

For these reasons, and those already made of record at pages 4-12 of the previous Office Action dated June 29, 2007, of which such reasons are incorporated herein by reference, rejection of claims 1, 13-17 and 30-33 remain proper and is **maintained**.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136 (a) will be calculated from the mailing date of the advisory action.
